

SNF PPS Update FY2011...

FY2011 rates, new case mix index (CMI), MDS 3.0, RUG IV implementation and more...
This is a time of significant change... Are you managing these changes appropriately?

RUG IV includes 66 payment categories, several new end splits, and is considerably different than RUG III. Beginning October 1 CMS will make payments under RUG IV. In the absence of further legislation, CMS will build a Hybrid RUG III (HR-III) to accommodate provisions of the Patient Protection and Affordable Care Act, and will retroactively adjust payments until RUG IV is fully implemented. The introduction of MDS 3.0 presents new methods for tracking and capturing skilled services, and payment weights (CMI) have been significantly revised. *This program will clarify CMS changes to SNF PPS in FY2011, which begins October 1, 2010.*

Are you capturing the RUG qualifiers in your documentation? How does the new case mix index (CMI) impact your payment for nursing and therapy services? How does the new MDS 3.0 capture therapy services? With the changes in look back periods and exclusion of most hospital services on MDS 3.0, are you setting the ARD appropriately? How can we best work within this new system to provide the highest level of care for our residents and receive adequate payment for services rendered?

Administrators, Nurses (including **RNAC/MDS Coordinators**), **Therapists, Business Office Personnel** and **Admissions** will benefit from attending this comprehensive overview of recent SNF PPS changes. Attendees will receive clarification on Medicare issues impacting facility nursing, therapy and business office departments.
